

CROWN and BRIDGE WARRANTY

At New Baltimore Family Dentistry we strive for perfection and patient satisfaction. We are happy to provide you with this extended warranty which, to our knowledge, is unique to the dental profession.

If a CROWN or BRIDGE becomes defective within a 5 YEAR PERIOD due to breakage or misfit, we will be happy to repair or replace it. This does not include situations like accidents (such as a car accident), that would break a regular tooth also. See schedule of benefits below, Crown and Bridge Warranty Effective as of 2/01/2016:

FIRST YEAR OF SERVICE (FROM TIME OF PLACEMENT)	100% COVERAGE
SECOND YEAR OF SERVICE	70% OF COVERAGE
THIRD YEAR OF SERVICE	60% OF COVERAGE
FOURTH YEAR OF SERVICE	50% OF COVERAGE
FIFTH YEAR OF SERVICE	40% OF COVERAGE
SIXTH OR MORE YEAR OF SERVICE	0% OF COVERAGE

In order to encourage you to protect your investment in your teeth, **this warranty is Null and Void if you do not maintain your 3-6 month continuing care which includes professional cleaning, annual x-rays and annual exam.** It's your responsibility to make these visits. However, by maintaining your dental health on a routine basis it is quite probable that your investment in your teeth will last well beyond the 5 years.

PREVENTION is the key. Crowns and Bridges are designed to protect and hold teeth together; they restore the proper form and function to a tooth and area, and can do it for a very long time. Crowns and Bridges prevent future tooth problems. ***Daily home care with a brush, floss and any other recommended device is preventive action. Regularly having your teeth professionally checked and cleaned, and having x-rays taken, can help you prevent most dental disease.*** This is why all of our warranties must be null and void if we don't see you for your regular 3-6 month check ups. With this action on your part, your teeth and gums will be healthier for it!
